PROFILE

Final-year Business Information Systems student with a double degree obtained at TBS Barcelona, and hands-on experience designing and shipping AI agents in a live enterprise setting. Strong foundation in data analysis, systems thinking, and problem-solving, with experience in Python, SQL, and the modern low-code AI stack. Interested in both the technical craft of building these systems and the broader question of how they can potentially reshape institutions and society.

EXPERIENCE

EUROCONTROL — Power Platform & AI Solutions Engineer

Brussels · Apr–Aug 2026

Skyline Traineeship. Designed and shipped a suite of AI agents for the Network Management Directorate, built on custom MCP connectors and tools.

- **Release Intelligence Agent** — ingests Microsoft 365 / Azure roadmap updates through custom MCP tools, classifies them by impact and audience, and routes approval-gated communications to the right teams.
- **Email Ingestion Agent** — parses and routes inbound email into structured, downstream actions.
- **ITSD Help-Desk Agent** — resolves internal IT support queries conversationally, integrated with ServiceNow.

Greenhill Fruit Farms — Roadside Seller

2025

- Handled €1,000–€2,000 in daily cash, stock and customer operations in a high-responsibility setting.

Client Solution Architects — Shadowing Assistant

2020

- Observed digital solution implementation, client requirement discussions and consulting workflows.

EDUCATION

University of Galway — BSc Business Information Systems

2023–2027

First Class Honours — Year 1 (71%), Year 2 (75%) · Academic Scholarship (Years 1 & 2)

- Notable modules: Advanced Database Technologies, Cybersecurity, Data Networks & Communications, Information Systems Technology, Advanced Application Development.

TBS Education, Barcelona — Bachelor of Management (Data Science for Business pathway)

2025–2026

Double-degree exchange year.

- Notable modules: Programming, Big Data Modelling, Data Management & Visualization, The Business Aspect of AI, Econometrics, Data Governance.

Coláiste Choilm — Leaving Certificate

601 points

SELECTED PROJECTS

- **Healthcare Market Access Modelling (hackathon)** — built decision-tree classification and regression models over 10,000+ observations to analyse European reimbursement dynamics; applied multicollinearity diagnostics and class-imbalance handling.
- **Personal Knowledge System** — built a personal knowledge agent (Obsidian + Claude Code) that ingests raw notes and reading and turns them into a self-organising, interlinked wiki — effectively a reactive journal that auto-tags, deduplicates and cross-links entries, maps connections as a graph, and flags orphaned or broken references as it grows.
- **SAP Design Thinking Challenge** — designed a circular-economy appliance-leasing platform for Gen Z with a four-person team, covering requirements engineering, stakeholder analysis, system architecture and business strategy.

SKILLS & CERTIFICATIONS

Technical: Python · SQL · R · Java · AI agent design (Copilot Studio, MCP connectors & tools) · Machine Learning · MongoDB · Power BI · LangGraph

Professional: Teamwork · Adaptability · Self-direction · Communication · Problem-solving

Certifications: ISO 8000 Master Data Quality Manager (ECCMA) · Model Context Protocol, AI Fluency & Claude 101 (Anthropic)

INTERESTS

Philosophy · Cybernetics · History
